# What is Microblading?

Eyebrow microblading goes by a few different names like, microstroking, micropigmentation, eyebrow embroidery, eyebrow feathering, and 3D eyebrows.

Microblading is a gentle, manual, **semi-permanent** tattooing process that deposits mineral based pigments underneath the first two layers of the skin. Pigments implanted are Iron Oxide and Titanium Dioxide, a safe non-reactive substance. The pigment lotions are specifically manufactured for implantation into human skin. Pigment fades away completely over the years unlike ink, making it a semi-permanent procedure. This avoids the blue/peachy colour you may see in old tattoos that were done with ink.

Microblading DOES NOT use a tattoo machine, but a single blade tool that looks like a pen.

Each hair is draw stroke by stroke with love and intention, and goes over again two times. Strokes are drawn behind existing hair to create a fuller brow and fill areas you might have over plucked.

“Let your eyebrows introduce you...!”

# What to expect from your microblading treatment with us?

Getting your brows microbladed at our salon involves a three step process:

1. Consultation Appointment (30min- 45min)- During this time we will go over the microblading process which includes; your suitability for the procedure, showing you the tools we use, pigments used, brow mapping process, and before and after photos of previous clients. This is your chance to ask ANYTHING related to microblading.
  2. Initial Microblading Session (2hr-3hr) - Your first session! Yay! During this time we will create your brows using our brow mapping method, numb your brows, choose a color and then perform the microblading session. The choice of colour depends on your skin undertone and the colour of your hair and eyes. The procedure will only begin when you have signed paperwork agreeing that it is the shape that you agree to.
  3. Perfecting Session (1hr -2 hr) - This session comes 4-6 weeks after your initial session. We will review your brows from the first session, fill in any spots that may have fallen out and give the brows an overall perfecting touch. After your perfecting sessions your brows should last 12-18 months, possibly longer depending on factors such as sun exposure, chemical peels, etc.
-

## What to expect after your MICROBLADING session?

Entire healing process will take from 4-6 weeks depending on your body regeneration and age. Your new eyebrows will go through several phases during the healing cycle. The pigment will appear very natural looking immediately after the procedure. The color of the pigment will appear much darker the next day.

Note that because of natural skin regeneration, after recovery period (peeling), brows might appear lighter than original. This might give you the impression that color is fading too quickly. Often even with proper care, clients may lose original hairstrokes which make brows look uneven. It is absolutely normal. That's is the reason why most clients need a touchup after 6 weeks.

Once the healing of the skin starts taking place, it will look like dandruff flakes or dry skin. However, this is just superficial color and dry skin being naturally removed from your eyebrows. The final look of your eyebrows will be apparent approximately 30 days after your procedure.

Never rub the treated area as it will disturb the skin from natural healing.

Once completely healed, always apply a layer of sunscreen SPF 30 up to SPF 50 on your eyebrows when exposed to the sun. Sun exposure might cause the color pigment to fade away more quickly. When using foundation, be aware when applying to avoid your healed eyebrows. If foundation covers healed brows, your eyebrows will appear lighter.

You can now enjoy your beautiful new temporary eyebrows. You will simply love your new gorgeous fresh look!

---

# What to do before your MICROBLADING appointment

Microblading results create amazing looking eyebrows, however the procedure is not recommended for everyone. To prevent any complications relating to your overall well being, please review the requirements and contraindications below.

Proper preparation for a microblading appointment will also help to achieve the best possible healed results, so be sure to prepare accordingly.

\*\*\*Appointments typically last 2 hours; babies or children can't be present during your appointment, so please make the necessary arrangements in advance.

## REQUIREMENTS BEFORE EYEBROW MICROBLADING:

- No Botox treatments should be done 3 weeks prior or 4 weeks after procedure
- No chemical peels 60 days before or after procedure (brows will peel quicker due to chemicals traveling under the skin)
- No Retinols/Retin-A or other anti-aging/acne creams, or serums containing acids for 7 days before the procedure as these will fade brows prematurely
- Do not work out or sweat heavily the day of the procedure (Or 2 weeks after)
  - Do not tan or have a sunburned face the day of the procedure
    - No waxing or tinting 3 days before procedure
- Stop taking aspirin, niacin, vitamin E, fish oil, krill oil, primrose oil, CoQ10 and ibuprofen *48 hours* before procedure
  - No alcohol or caffeine *24 hrs* before procedure
  - No exercise on the day of the appointment.

**Failure to follow these instructions will alter your healed results negatively.**

---

## **Microblading/ Feathering procedure cost : \$600 inc GST.**

Initial Microblading Session \$400

Perfecting session \$200

### **The price includes**
